According to data from a study by the National Highway Traffic Safety Administration, shifting into reverse may be **more** dangerous than previously thought. According to the first study conducted on the issue, 463 people were killed by vehicles backing up in 2007. That is more than 8 deaths per week. In the same period, about 48,000 people were injured in backup accidents. A Rosco backup camera makes backing up easier and your fleet or personal vehicle less prone to accidents!
