- ▶ Added new field `email_sent` in response.
- ▶ Added new field `is_datausage_locked` in response.
- ▶ Added new field `is_flood` in response.

Updated Objects

The following objects have been updated.

Device Object

The following fields have been added to the device object when returned by relevant APIs.

key	type	description
<code>is_flood</code>	boolean	A flag that indicates if the event was marked as a "flooding" event. Events with <code>is_flood: true</code> are quarantined.
<code>is_datausage_locked</code>	boolean	A flag that indicates if the camera the event was uploaded from has a data usage lock. Cameras with <code>is_datausage_locked: true</code> will have their events quarantined.

Relevant APIs

- ▶ [GET /partners/companies/{company_name}/events](#)
- ▶ [GET /partners/companies/{company_name}/events/dates](#)
- ▶ [GET /devices/{device_id}/events](#)
